

Innovation for infection control

CleanScreen, the innovative folding medical privacy screen has been designed from the start with infection prevention in mind. All surfaces are smooth and completely accessible, with no seams or joins, making it very easy to clean and significantly reducing the opportunity for bacteria to harbour and multiply.

CleanScreen puts infection control **first.**

CleanScreen is very versatile and adaptable. It can be used in multiple areas and rapidly deployed for patient isolation and privacy as required.

SMOOTH SURFACES & PATENTED HINGE DESIGN

Ensuring every part of the screens are accessible for thorough clinical cleaning

QUIET & EASY TO OPERATE

Every screen has medical grade braked castors

SUPER TOUGH & FULLY WATERPROOF

Panels can be disconnected for a terminal clean. Robust panels to withstand knocks.

- One-piece panels with no seams and joins for pathogens to hide.
- Modular and available in different lengths to provide flexibility and allow panels to be easily added or replaced.
- Reaches to less than 10cm / 4" off the floor and extends to approx 1.9M / 6'3" in height- providing an excellent infection barrier and privacy for patients
- Available wall or trolley mounted
- Available with integrated anti-bac additive to provide lifelong protection that will not wash or rub off
- Save on ongoing curtain cleaning and replacement costs

Trolley Mounted				Screen Length inc fixing		Screen height inc castors
